

# GHB - GBL - G - Liquid E

Emergency Contact:

**An overdose with one of the above substances may be a possibility if this person is found collapsed.**

You **SHOULD**:

- Call the Emergency Services (112).
- Check that he/she is breathing.
- If not breathing, attempt CPR, if trained.
- If breathing, place in the recovery position, and continue monitoring breathing.
- **MAKE SURE** they have not vomited (risk of choking).

# GHB - GBL - 1,4 Butanediol

(For Emergency Services)

**Note:** Someone can transition from an overdose into serious withdrawals (risk of seizures & rhabdomyolysis).

For treatment of withdrawal consult the Maudsley Prescribing Guidelines, 12th edition or later visit: <http://maudsley-prescribing-guidelines.co.uk/>
